DETAILED ACTION

Election/Restrictions

Applicant's arguments, see Response, filed 8/24/2007, with respect to the restriction requirement have been fully considered and are persuasive. The restriction requirement has been withdrawn.

Allowable Subject Matter

The indicated allowability of claims 27-33 is withdrawn in view of the newly discovered reference(s) to Barath and Vigil. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 2, 3, 5, 8, 10, 11, 12, 15, 17, 18, 19, 22, 23, 24, and 27-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Barath et al (US 5,112,305).

Barath discloses in Figure 1 a catheter having a balloon (1), a plurality of rupturable micro-needles (10; column 3, lines 16-40), an interior compartment (Figure 5) for containing active material, a catheter lumen used for both inflating the balloon and delivering the active material, and the length of the microneedles being 0.25mm.

W

2. Claims 1, 2, 4, 5, 15, 17, 18, 19, 27, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Vigil et al (US 5,713,863).

Vigil et al disclose in Figure 6 a catheter (20), a balloon (30), a plurality of rupturable micro-needles (40) disposed on a plate (Figures 5B and 6B), an interior compartment (38) for containing active material, and a first lumen (38) used to deliver an active material and a second lumen for inflating the balloon.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 9, 13, 14, 25, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barath OR Vigil et al in view of Yuzhakov et al (US 6,565,532).

Barath OR Vigil et al disclose the claimed invention except for there being between 10 and 1,000,000 microneedles per cm² on the outer surface of the balloon, with the diameter of the microneedles being between 10nm and 1mm. Yuzhakov et al teach in column 6, lines 41-58 that it is known to use microneedles with a diameter between 10nm and 1mm in a density of 10 and 1,000,000 microneedles per cm². It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system of Barath OR Vigil et al with microneedles having a diameter and density as taught by Yuzhakov, since such a modification would provide the system with more effective microneedle penetration.

Allowable Subject Matter

Claims 32 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
